### USER EXPERIENCE

Quad-Core CPU 22" touchscreen panel, 1920x1080 full HD for an e-commerce-like user experience.

The screen provides a menu where the consumer can browse product descriptions, promotional images and videos.

### REAL-TIME DATA SERVICE

Magex provides a vending machine real-time management service, thanks to our web-based interface accessible from virtually any kind of device.

You can check real-time selling statistics, stock status, actual stock for every currency denomination.

You will be able to monitor the internal temperature and visualize it in a chart.

## MAGEX PATENTED DISPENSING SYSTEM

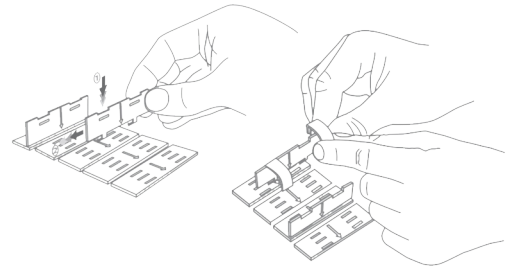

Magex vending machines boast unprecedented flexibility in managing **very different items**.

Our **Conveyer patented dispensing system** fits **any kind of product**, also combining adjacent lanes to move larger products.

End-user can **easily customize lanes** setup to manage effectively any size and shape item to sell.

Moreover, interlocking partitions keep items separate into the same lane.

Our advanced multi-function self-diagnostic tool performs a continuous system health check, starting from lanes operation status before each delivery up to a full system reboot if needed.

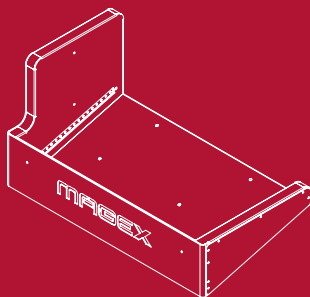

## SHUTTLE DELIVERY SYSTEM

Our internalshuttle gently delivers any kind of items in the drawer placed to the right of the window, thus leaving more space for your products.

A robotic arm moves the shuttle to the needed positions to collect every single item, providing an **entertaining shopping experience**.

Side photosensors recognize which product has been moved.

## BIGSTORE 9

Magex vending machines are engineered for delicate, fragile products of any shape such as hi-tech items, cupcakes, eggs cases or glass bottles.
